PROFESSIONAL SUMMARY

Product designer with end-to-end consumer mobile and web experiences across AI marketplaces, government public services, membership platforms, and internal ops tools. Proven impact in shipped products, including reducing missed redemptions from 24% to 18% on a nationwide government invoice app used by millions, and increasing listing completions by 30% at an early-stage AI startup. Strong foundation in user research and data-informed iteration; experienced sole IC operating across the full design stack from 0→1 builds to mature design systems.

WORK EXPERIENCE

Product Designer — Fixed-Term Contract (Concurrent) · MINA AI | Sep 2025 – May 2026

San Francisco, California (Remote) · Early-stage AI marketplace startup

- Sole IC end-to-end designer at an early-stage AI startup; owned a full design system in Figma (component library, tokens/variables, auto-layout architecture, variant management), directly accelerating sprint velocity with a cross-functional team of 1 PM and 5 engineers.
- Defined Jobs-to-Be-Done for sellers by synthesizing qualitative user research with PostHog funnel analytics; redesigned checkout and listing flows based on validated insights, increasing completed listings by 30%.
- Architected user flows and high-fidelity prototypes for AI-assisted features (Photo-to-Publish, Parenting Copilot), with deliberate attention to user control, transparent automation, and edge-case handling, balancing AI capability with trust and predictability for everyday consumers.
- Led product decision-making as primary design voice: synthesized market research, user needs, and company strategy to define MVP scope and feature prioritization alongside co-founders; clearly communicated design rationale and tradeoffs to both technical and non-technical stakeholders.

Product Designer — Permanent Full-Time (Concurrent through Nov 2025) · TurnCloud Technology Service | Jul 2024 – Nov 2025

Taipei, Taiwan (On-site) · Cross-platform mobile & web, government and consumer products

- Reduced missed prize redemptions from 24% to 18% on the Taiwan Ministry of Finance Invoice App, a nationwide public service handling sensitive financial data for millions of users, by redesigning authentication flows through heuristic evaluation and collaborated with cross-functional teams of 10+ engineers with clear documentation of design decisions and tradeoffs.
- Designed inclusive, privacy-aware interfaces for a financially sensitive government service used by a highly diverse population (teenagers, seniors, foreigners, visually impaired users); synthesized 30+ research sessions into JTBD-framed insights that shaped multi-mode interface strategies balancing WCAG compliance with modern UI preferences.
- Created detailed user journey maps, personas, information architecture maps, and Figma prototype demonstrations used to communicate design proposals to government senior leadership for project approval.
- Built and maintained a 50+ component Figma design system for a B2B CRM platform, standardizing UI across mobile and web to enable faster and more consistent feature development.
- Sole designer on a government backend platform built from 0→1; independently designed full product (information architecture, component system, high-fidelity specs) spanning complex multi-role admin interfaces. Led UX for the Baskin-Robbins Taiwan membership platform, managing cross-timezone stakeholder alignment with Japan partners.

UX Designer — Fixed-Term Contract · YK Labs | Feb 2024 – Jun 2024

Los Angeles, California (Remote) · AI-powered interview preparation platform

- Increased full mock interview completion rates by 35% on PerfectInterview.ai by redesigning onboarding, simplifying setup steps, and restructuring task progression, validated through heuristic evaluation, usability testing, and PostHog analytics to identify drop-off points and measure funnel performance.
- Designed and launched a responsive marketing website in Framer using code-adjacent rapid prototyping, improving product clarity and pre-signup conversion.

EDUCATION

Bachelor of Arts in New Media Studies · University of Toronto | Sep 2019 – Jun 2024

User Experience Design Diploma · BrainStation | Apr 2023 – Jul 2023

SKILLS

Tools & AI Systems: Figma, Framer, Adobe Illustrator, Adobe Photoshop, WordPress, Adobe Premiere, PostHog, Google Analytics, Canva, Claude, Codex, Cursor, Figma Make, Gemini

Core Expertise: End-to-End Product Design, Business-Driven Design Strategy, User Research (Interviews, Focus Groups, Usability Testing), Journey Mapping, Information Architecture, Wireframing, A/B Testing, Competitor Analysis, Brand Strategy & Identity Design

AI & Workflow Optimization: AI-Driven Design Workflows, AI Workflow Integration & Auditing, Process Documentation, Agile, Sprint Planning, Cross-functional Collaboration, Stakeholder Communication

Design Platforms & Systems: Figma Advanced Architecture (Component Libraries, Variables, Tokens, Auto-layout, Variants, File Architecture), Design System Ownership & Maintenance, iOS Mobile, Responsive Web, Accessibility (WCAG Compliance), B2B Dashboards
